Firefighter Survival: Get Out Alive! – FF175 This course is designed to prepare firefighters for the dangers that are present on the modern day fire ground. Students learn and demonstrate proven survival skills that have prevented firefighters in the past from dying when unexpected events occur. Topics include SCBA emergencies, escapes and confidence, entanglement emergencies, wall breeches, and disorientation emergencies. Additional topics include anchors and knots, rope escape techniques; hose slide, straddle, hang and drop. This course is geared towards keeping the firefighter from becoming trapped in a situation where they themselves would require rescue. **This course requires a high degree of physical fitness and the ability to cope with physically and mentally demanding situations. ** Participants must bring SCBA, spare bottle, and turnout gear****

Intro to Fire Pumps – FF111 This course is designed to familiarize the student with the basic operation of fire department pumper apparatus. Course subject areas include types of pumps, pump operation, pump accessories, daily maintenance, and simplified fire ground hydraulic calculations. Classroom activities and practical application is included as part of the course. ****Turnout gear required for the hands-on portion of this class****

ARSON DETECTION FOR THE FIRST RESPONDER – FF136 This course is designed to enable the student to recognize the indicators of an intentionally set fire, preserve evidence, report the information to the appropriate office, know the role of a first responder, and that the role is not to determine cause and origin of the fire. Major topics include fire behavior, critical observations of the first responder, fire cause, scene security and evidence preservation, legal consideration, and reporting of findings

SCBA – Using it – FF114 This course is designed to provide fire department personnel with the basic knowledge and skills to safely utilize fire service self-contained breathing apparatus (SCBA). The course subject areas include understanding hazardous atmospheres and the need for SCBA, types of SCBA, donning, basic use, return to service, and inspection/basic maintenance. **** Bring your own SCBA, spare bottle and turnout gear ****

LEADERSHIP III: STRATEGIES FOR SUPERVISORY SUCCESS – FF123 This course is designed to provide the student with leadership skills of mid-level managers, especially fire company officers. Major topics covered in the course are decision-making, problem solving, Brainstorming, meeting management, and understanding the relationship between resources and services provided by a fire company.

INCIDENT SAFETY OFFICER – FF152 This course examines the Safety Officer's role at emergency response situations. A specific focus on operations within an Incident Command System (ICS) as a Safety Officer is a main theme. The student will be able to identify and analyze concerns as they relate to all-hazards scene evaluation, and communicate recommended solutions to the command authority.

Low Angle Rope Rescue – Course Goals: The purpose of this course is to provide firefighters, EMTs and rescue personnel with an understanding of basic hardware of rope rescue, as well as the knowledge that affords the rescuer the versatility and flexibility to safely accomplish diverse rescue tasks.

Aerial Apparatus Familiarization- FF165: This course is designed to provide generic training on aerial apparatus operations and their tactical use. The program is designed so that the instructor can incorporate specific training elements on the host department's type of aerial apparatus.

Training operations in small departments-FF168: This course is a foundation and provides a general understanding of how training operations can be managed successfully within small fire and rescue departments. This course is designed to provide students with some basic tools and skills to coordinate training function in a smaller departments. Course content includes leadership issues in fire service training function, including an understanding of a standard of care and the impact of Occupational Safety and Health Administration (OSHA) and National Fire Protection Association (NFPA) standards; safety considerations in training; marketing training internally; identifying ways to justify training needs; selecting and evaluation training curriculum and materials from outside sources; and effective delivery and evaluation training.

Strategies and Tactics for Initial Company Operations-FF192: This course is designed to develop the management skills needed by newly appointed Company Officers, acting Company Officers, and those aspiring to be Company Officers. All activities and scenarios used in this course are based on structure fires, utilizing small group, scenario-driven exercises that incorporate chapter topics as they are covered. A final, message-driven simulation activity will wrap up Units 3, 4, and 5.

Basic Search and Rescue: SAR This class is designed to provide you with the basic skills involved with tracking and locating person who have become lost in an outdoor situation. Including establishing command, interview techniques, lost person behavior, map reading, including a compass confidence course, and patient packaging. This course includes classroom lecture and hands on training. A full scale mock search will be held on Saturday night. **** wear comfortable clothing and shoes for hiking, also a flashlight is recommended****

Thermal Imaging Camera- TIC: This class is highly recommended for anyone that has a thermal imaging camera in there department or is looking to purchase one. The class will have classroom lecture as well as hands on training in the use of a TIC. The course will cover TIC basics as well as advanced use, including scene size up, initial search operations, large area searches, and much more. **** Please bring full turnout gear and a thermal imager if your department has one available****

Advanced Vehicle Extrication-AVE: This course is designed to build upon the knowledge learned in the basic vehicle extrication class, topics covered include, new vehicle, technologies, hybrid vehicles, all electric cars, and other new technologies found in the newest vehicles. This course includes classroom as well as hands on training. **** Each student must have full personal protective equipment****

Mobile Water Supply: The course covers the Insurance Service Office (ISO) grading schedule and requirements for tanker shuttle water supply, water supply calculations, basic tanker operations, and water shuttling. Both classroom and practical hands-on training are incorporated in the course. A full scale water shuttle will be done at the end of the course.

NIMS ICS- 300 This class is intended for mid-level officers who will serve as command or general staff in an ICS organization. Prerequisites are IS-100, IS-200, IS-700, and IS-800 all these classes can be taken online at FEMA's training website

Response to Explosive incidents: This free class taught by TN Bomb and Arson will cover the basics on responding to explosive, and or potential bombing incidents. This will involve classroom as well as hands on explosive demonstrations in the field.
